September 2013

Hello!

Superfast Cornwall Fund

Superfast broadband is taking off in Cornwall and is now available to more than 75% of premises in the county. This means that thousands of businesses can take advantage of faster broadband speeds and transform the way they do business.

We would appreciate if you could share this information with local businesses and at future Town/Parish Council meetings:

Cornwall Development Company currently has funding available for businesses that are making changes and investments to their company which are based on the use of superfast broadband. Projects can be big or small and can include investments in video conferencing, new IT infrastructure, new e-commerce websites, app development and much more.

Funding, under the Superfast Cornwall Fund, is available for projects from £1,000 up to £50,000. More information can be found at www.superfastcornwall.org/fund or by calling **01209 311104**.

By the end of 2014, at least 95% of people in Cornwall and the Isles of Scilly will be able to connect to superfast broadband, and we are aiming to bring faster broadband to everyone else through alternative technologies.

Businesses can check to see if they can order superfast broadband by visiting www.superfastcornwall.org/check. Prices start from as little as £15 per month from a range of Internet Service Providers.

Yours faithfully,

Nigel Ashcroft
Programme Director, Superfast Cornwall
