to me

Hi Robin,

It's fine to issue the questionnaire and draft the policies once you know what the aspirations of your community are – there is no need to draft the policies first (indeed, it is better to do it that way round).

We can't tell yet whether you will need to have an SEA as a decision on this cannot be made until the draft policies are at a reasonably advanced stage.

For the affordable housing numbers, they represent people currently on the list, actively looking for housing.

Hope that is what you are after – let me know if I can help further.

Kind regards,
Colleen
